

SUBJECT: NAB's petition 04-160  
Dear Commissioners;

I would like to express my disapproval of and respectfully urge the FCC to reject the NAB's petition to limit the services provided by satellite radio.

While I am a subscriber to XM radio, my opinion is based on a broader concept. The concept of the free market system and that economic competition is the engine that drives our economy and enhances our standard of living to the greatest levels in human history.

If the members of the NAB feel threatened by the superior service provided by satellite radio, they should increase their services in order to remain competitive - not look to the government to protect them from a superior product. A protectionists position does serve or enhance the people of our country, it only serves the interests of the inefficient providers.

Thank you for considering my input.
